Brickwell Pvt. Ltd. — System Update Reference

# Proposed Updates: Visual Workflow & Permission Guide

Executive Overview of Current States, Proposed Changes, Role Permission Matrices, and User Journeys

**Target Audience:** Managing Director & Development Team

**Document Purpose:** High-level visual guide & approval roadmap

**Scope:** Updates UPD-01 to UPD-06 and ATT-01

**Format:** Concise 1-Page Summary Per System Update

## UPD-01 — Dashboard Active Projects & Contract Value Summary

### Current State:

- Active Projects StatCard displays total active count as static non-clickable text.
- Contract Value StatCard displays overall total quotation amount across all projects as a static summary.

### Proposed Update:

- **Clickable Active Projects:** Clicking launches a modal displaying the 3 active projects with quotation vs cost summary.
- **Clickable Contract Value:** Clicking opens a financial drawer with project-wise breakdown (contract value, material, labour, contractor, petty cash, and margin).

### Permission Matrix:

| Role | Access / Action Permitted |
|---|---|
| MD / Owner | Allowed (View & Click Breakdown) |
| Accounts | Allowed (View & Click Breakdown) |
| Site Supervisor | Restricted (Hidden / Non-clickable) |
| Viewer | Restricted (Hidden / Non-clickable) |

### User Workflow Journey:

## UPD-02 — Financial Privacy & Role-Based Dashboard Access

### Current State:

- Financial figures (Contract Value, Spend, Cash on Hand) are exposed to all logged-in roles.
- Database permissions grant `SELECT` access to all `authenticated` users without role-based column guards.

### Proposed Update:

- Restricts sensitive financial amounts exclusively to authorized management roles.
- Hides financial StatCards in UI and enforces backend Row-Level Security (RLS) policies to block API inspection for non-management users.

**Pending Confirmation: Final confirmation required whether financial access is restricted strictly to MD-only or includes Admin/Accounts.**

### Permission Matrix:

| Role | Access / Action Permitted |
|---|---|
| MD / Owner | Allowed (Full Financial Access) |
| Accounts Staff | Allowed (View & Enter Financials) |
| Site Supervisor | Restricted (Financials Hidden) |
| Viewer | Restricted (Financials Hidden) |

### User Workflow Journey:

## UPD-03 — Labour Attendance & Payroll Module Restructuring

### Current State:

- Payroll page handles monthly wage runs, gross pay, deductions (PF/ESIC), net pay, and MD approvals.
- Attendance page logs daily working hours and daily calculated wages independently.

### Proposed Update:

- Integrates daily Attendance entry with weekly/monthly salary handling.
- Auto-populates weekly balances, advances, and monthly settlement runs from daily attendance while preserving payslips, statutory deductions, and MD approvals.

**Pending Confirmation: Pending Management Confirmation: Complete removal of Payroll UI vs Integrated Attendance-Payroll Model (Recommended).**

### Permission Matrix:

| Role | Access / Action Permitted |
|---|---|
| MD / Owner | Allowed (Full Edit & Approve Runs) |
| Accounts Staff | Allowed (Prepare Runs & Deductions) |
| Site Supervisor | Enter Daily Site Attendance Only |
| Viewer | Read-Only (Non-Financial) |

### User Workflow Journey:

## UPD-04 — Dashboard Spend Breakdown & Material Costs

### Current State:

- Spend StatCard sums expenses + site wages over 6 months as a single static figure.
- Material procurement costs are not broken down by material type on the main dashboard.

### Proposed Update:

- Makes the Spend StatCard clickable to display a detailed Material Expenditure Breakdown drawer.
- Groups material costs by category (Cement, Steel, Sand, Hardware) sourced from Material Receipts (GRN) and tagged expenses.

### Permission Matrix:

| Role | Access / Action Permitted |
|---|---|
| MD / Owner | Allowed (View & Click Spend Drawer) |
| Accounts Staff | Allowed (View & Click Spend Drawer) |
| Site Supervisor | Restricted (Hidden) |
| Viewer | Restricted (Hidden) |

### User Workflow Journey:

## UPD-05 — Dedicated Office Overhead Expenses Section

### Current State:

- Office overheads (stationery, internet, travel, bank charges) are mixed into site expenses or saved with `project_id = NULL`.
- No isolated dashboard view exists for administrative corporate expenses.

### Proposed Update:

- Adds a dedicated 'Office Expenses' dashboard button and view.
- Filters existing expense records where `project_id IS NULL` or category belongs to administrative overhead, preventing duplicate transaction records.

### Permission Matrix:

| Role | Access / Action Permitted |
|---|---|
| MD / Owner | Allowed (Full Access: Add/Edit/Delete) |
| Accounts Staff | Allowed (Add & Edit Office Expenses) |
| Site Supervisor | Prohibited |
| Viewer | Prohibited |

### User Workflow Journey:

## UPD-06 — Material Suppliers & Subcontractor Management

### Current State:

- Subcontractors use Work Orders (WO), Measurement Books (MB), and Contractor Bills (CB).
- Material suppliers use Indents (MR), POs, GRNs, and Supplier Payments.

### Proposed Update:

- Separates subcontractor piece-rate milestone payments from daily wage attendance.
- Tracks subcontractor gang attendance for site presence while calculating disbursements strictly against Measurement Books (MB) and approved bills.

**Pending Confirmation: Pending Confirmation: Exact meaning of 'two material types', 'ten', and 'contractor in material' from meeting notes.**

### Permission Matrix:

| Role | Access / Action Permitted |
|---|---|
| MD / Owner | Allowed (Full Approval & Management) |
| Accounts Staff | Allowed (Record Bills & Payments) |
| Site Supervisor | Enter MB & Gang Attendance |
| Viewer | Read-Only (Status Only) |

### User Workflow Journey:

Issue Work Order (WO) to Subcontractor → Supervisor Logs Measurement Book (MB) → Accounts Generates Contractor Bill (CB) → MD Approves Bill Disbursement → Record Contractor Payment

## ATT-01 — Weekly Construction Labour Attendance & Wage Register

### Current State:

- Attendance page allows logging single-day attendance entries per worker.
- No multi-day weekly spreadsheet grid view matching site register sheets.

### Proposed Update:

- Implements a 7-day spreadsheet-like Weekly Attendance Register (matching Brickwell reference sheet 13.09.2026 to 19.09.2026).
- Supports 7 daily time columns, fractional units (7.5, 8.5), team totals (Vinoth, Sathish, etc.), Bus/Petrol allowances, advance deductions, and Saturday weekly settlements.

### Permission Matrix:

| Role | Access / Action Permitted |
|---|---|
| MD / Owner | View & Approve Weekly Settlement |
| Accounts Staff | View, Record Allowances & Advances |
| Site Supervisor | Select Site/Week & Log Daily Hours |
| Viewer | Restricted (Financials Hidden) |

### User Workflow Journey:

Select Site & Week (13.09 to 19.09) → Supervisor Logs 7-Day Attendance & Hours → System Calculates Wages (Wage × Units) → Accounts Enters Bus/Petrol & Advance → Process Saturday Settlement & Print Sheet
